

Enlightenment, Creativity and Education

Polities, Politics, Performances

Lennart Wikander, Christina Gustafsson and Ulla Riis (Eds.)

Enlightenment, Creativity and Education: politics, politics, performances presents some outcomes of the 24th Conference of the Comparative Education Society in Europe (CESE), held in Uppsala, in summer 2010. Bringing together studies related to knowledge and educational policies, the volume deals with the role of knowledge, globalisation and new trends what have an effect of identities and policies. Changes in societies have changed the rhetoric concerning the position and function of education. What – in comparative perspective – are the historical forces and sociological and economic structures which are influencing our ideas and assumptions about identity and wisdom and the future of politics and economies? So the conference asked: what are the contemporary and emergent nature of politics, and the politics of the future – and who says so? This publication is structured along three themes for the purpose of giving illustrations to some of the questions asked. The themes are I. Comparative Education – The role of Knowledge and Educational Research, II. Globalisation and New Trends, III. New Knowledge – Identities – Policies.

Lennart Wikander is a Senior Lecturer in the Department of Education at Uppsala University. His field is Higher Education including its relations to the labour market. Educational policies in a comparative perspective have also been a major part of his lecturing and research. He is President of NOCIES (Nordic Comparative and International Education Society). He is also member of the CESE Executive Committee.
